DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1,2,4-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Orth
US PN 5,800,521.

Orth disclose in figures 1-2, lines 64 of col. 1 through line 30 of col. 2, and lines 62 of col. 2 through line 36 of col. 3 a catheter system for delivering a longitudinally collapsible prosthesis by pulling at the distal end of the prosthesis.

3. Claims 1,3,5 are rejected under 35 U.S.C. 102(e) as being anticipated by Ahari
US PN 6,102,942.

Ahari disclose in figures 10-11 a catheter system for delivering a longitudinally collapsible prosthesis by pulling at the distal end of the prosthesis using gripping jaws.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Orth US PN 5,800,521 in view of Pinchuk et al. US PN 5,700,269.

Orth meets the structural limitations of claim 7 but lacks the express written disclosure of administering a particular therapeutic fluid such as a heparin solution. Pinchuk et al. teaches in lines 43-67 of col. 5 a catheter for delivering a vascular prosthesis wherein a heparin solution is administered thru a lumen of the catheter in order to prevent coagulation during surgery¹.

Therefore it would have been obvious to one of ordinary skill in the art at the time of the invention to modify the device disclosed by Orth to include heparin solution delivery in order to prevent coagulation during surgery.
